JUNIOR DJANGO DEVELOPER (AMOR INNOVATION, VADODARA)

- This Company is a product based company and their product was built in VUE-JS(Frontend) and Django-DRF(Backend).
- My main task is to develop some vivid functionality and solve bugs , which was reported by the clients
- In this project, I learned many advance concept of Django Rest Framework and VUE-JS, like viewset, xlxs writer, vue-js, lifecycle, and much more.

1st MAR 2021
To
25th OCT 2021

JUNIOR PYTHON DEVELOPER (BONRIX SYSTEM, AHMEDABAD)

- My main aim in this work is to develop a Society Management app
- In this project, the front end was HTML and CSS; although, the backend was Django.
- For the Async task I used AJAX call, and for rendering query in template I used Jinga template language
- The model was build by me from scratch
- The project was successfully delivered to client at a given instance of time

23rd APR 2022
To
27th JUL 2022

PYTHON DEVELOPER (FREELANCING) (AAHATECH, ANAND)

- I joined this industry as a freelancer and this is product based company, their product is to track vehicle location at a particular time
- My role is to fetch that data and show it to their respective client's email in their given instance of time.
- The Client can see data in JSON or else in the CSV Format.

1st JUN 2019
To
19th JUN 2020

PYTHON DEVELOPER (INTERN) (SILVERWING TECHNOLOGY, AHMEDABAD)

- This company provides average training to the intern. Overall, we learn some basic things about python.
- The main concept of python, and where it is used mainly like in A.I., Data Analysis, etc.
- At the end of the internship, I develop Renting Management System, where user can upload the picture of product, either they can rent or sell the product.

ADDITIONAL EXPERIENCE

ECOMMERCE APP (DJANGO PROJECT)

- This project was developed by me in, the frontend was REACT-JS and the backend was DJANGO rest framework.
- For authentication of the user, the JWT token was used.
- Users can make purchases and track their respective order, based on order id (UUID)
- Users can also rate the products after there successfully purchase.
- Filter was also added regarding the category wise, price range, search, etc

CRM MODEL (DJANGO PROJECT)

- The frontend for this project was HTML, however, I downloaded a template from a thesaurus, and the backend was DJANGO (Jinga).
- This Project was from Scratch , and also implement personal email system.
- This CRM can show leads, contact, task, etc, type of functionality.

SCHOOL MANAGEMENT (FLUTTER PROJECT)

- This is my first flutter project and develop many functionalities in every stage
- However, in the first stage I learned types of widgets like stateless widgets, stateful widgets, layout widgets, material widgets, etc.
- The backend for this project was DJANGO.
- This project has three user roles:-
 - 1)Principal
 - 2)Teacher
 - 3)Student
- Every user has all different functionality in-app, Student can see the notice for a particular class, although, the teacher can view student overall progresses, etc.
- Moreover, I am still working on this project because, it is half completed, and Need to develop many functionality
